AI: RAG, LLM integration, Dify, agent workflows

PROFESSIONAL EXPERIENCE

Software Engineer | Ninja Digital Innovations Ltd. Jul 2025 – Present

- Develop production React/Next.js and TypeScript features, integrating REST APIs, relational data, and reusable responsive components across corporate and business applications.
- Implement Node.js/Prisma-backed workflows with organization-scoped access permissions for different user types.
- Trace duplicate requests and news-content inconsistencies; contribute API/data-fetching corrections and regression checks to support more consistent application behavior.
- Investigate Lighthouse score variability and cross-breakpoint UI defects; document findings, verify fixes, and coordinate release QA with Japan-based stakeholders.

Software Engineer | Brand Cloud Inc. Mar 2023 – Jun 2025

- Delivered customer-facing Next.js/TypeScript features for MoeGuide and Suirikyou, including destination content, assessment/certification flows, API integrations, and Stripe payment states.
- Translated Figma specifications into reusable responsive interfaces and resolved device-specific layout and interaction defects.
- Contributed Cypress end-to-end tests, code reviews, and sprint delivery with Japanese engineers and product stakeholders.

Software Engineer | Suncreer Co., Ltd. Dec 2022 – Feb 2023

- Developed inventory, purchasing, sales, and reporting workflows using React, Laravel, MySQL, and REST APIs.

Software Engineer | Bconns Technologies Ltd. Oct 2021 – Mar 2022

- Built React screens and REST integrations for inventory, stock, purchasing, and sales operations.

PROJECTS

Brand Cloud Corporate Website `https://brandcloud.co.jp/`

Contributed to WordPress-to-Next.js modernization with responsive corporate pages and API-driven news interfaces. Investigated duplicate fetches, content inconsistencies, image display, and Lighthouse performance issues.

Technologies: Next.js, TypeScript, Tailwind CSS, REST APIs

KnowledgeLinks AI (Raggie) `https://knowledgelinks.ai/lp1/`

Developed interfaces for an enterprise knowledge platform using retrieval-augmented generation and AI agents. Integrated tRPC endpoints and Prisma/PostgreSQL-backed data flows, including asynchronous loading and error handling.

Technologies: Next.js, TypeScript, tRPC, PostgreSQL, Prisma, RAG

Suirikyou https://suirikyou-brandcloud.vercel.app/

Implemented assessment and certification experiences with backend-connected workflows and Stripe payment interactions, including explicit loading, success, and error states.

Technologies: Next.js, TypeScript, Stripe, APIs

MoeGuide https://moeguide-app.vercel.app/

Built destination-content and itinerary interfaces, integrated travel-content APIs, and refined mobile/desktop usability through reusable components.

Technologies: Next.js, React, TypeScript, REST APIs

Brand Cloud Service Website https://solution.brandcloud.co.jp/

Developed responsive service pages and integrated dynamic content during a WordPress-to-Next.js migration.

Technologies: Next.js, React, TypeScript, Tailwind CSS

Online Reputation Management Private Project

Contributed brand-monitoring interfaces, risk-keyword signals, and REST API-connected review workflows.

Technologies: React, TypeScript, REST APIs
